ABSTRACT

This information analysis paper, based on a search of the ERIC data base, presents an in-depth analysis of current topics in group guidance. A variety of group guidance models are discussed, then issues and trends resulting from their implementation are analyzed. Implications are stated for further development of group approaches to guidance services. The effects of this aspect of guidance on counselors is also discussed. The second part of this document contains an extensive list of journal article and document abstracts on this topic, all gleaned from the ERIC system.

INTRODUCTORY NOTE

For several years ERIC/CAPS has produced Searchlights--computer searches of the ERIC data base on topics identified as being of major interest and importance by our on-site users and by helping professionals working in the field. The Searchlights have proved to be highly useful as a synthesis of existing documents on a given topic, and we have been pleased to provide them at low cost for persons desiring packaged, instant information in a particular area. This year we have gone one step further.

Choosing the nine topics which were in most demand by our ERIC users, we decided to explore in depth the sources revealed in the computer search and identify prime issues and possible trends from the documents, as well as point out the implications of the information for the work of professionals in our field of counseling and personnel services. In so doing we hoped to provide an even more valuable service to those who recognize ERIC as a rich storehouse of information, but who lack the time to examine in detail and analyze the total collection of data.

The nine areas chosen for this special treatment are the following:

Divorce and One-Parent Family Counseling

Career Resource Centers

Counseling the Exceptional: Handicapped and Gifted

Violence in the Schools

Career Development: Programs and Practices

Group Guidance

Evaluation of Counselor Effectiveness

Mid-Career Change: An Overview of Counseling Practices and Programs

Counseling for Preretirement

The computer search is included in each Searchlight as before, but in addition, readers will find an opening narrative which highlights certain documents, identifies issues and trends, and suggests possible implications for the future of guidance and guidance professionals.

We should point out that two of these Searchlights are slightly different from the others. The ones entitled "Mid-Career Change" and "Counseling for Preretirement" contain sources from a number of data bases (including ERIC). These particular analyses of the literature were prepared for an international guidance conference and were designed to review sources from as many data bases as possible. Interestingly, however, the most useful informational source in preparing the papers was ERIC, and much overlap was found to exist in the documents brought to light from the many data bases searched.

This explains the difference between our current series of Searchlights and previous ones. If you find the narrative helpful--more helpful than just the basic search--we would appreciate your telling us so. A major purpose of ERIC is to provide information of genuine value to you, the user.

GROUP GUIDANCE

Stephen Joel Gill

Group approaches to counseling have been developed to achieve a variety of goals, for a variety of clients, and in a variety of ways. This diversity has resulted in innovative but largely untested helping models of group guidance. New resources and strategies have evolved but there are many unresolved issues as well. This review of recent literature will identify a variety of group guidance models, issues and trends in the field that result from their implementation, and the implication of the further development of group approaches to guidance services.

Models for Group Counseling

The goals of group guidance have included many of the kinds of changes students traditionally seek through individual counseling. However, group counselors believe that goal-directed social interaction and group support are necessary conditions for much academic, intrapersonal, interpersonal and community problem solving. These conditions are available only through planned, small group experiences.

*Goals of Group
Guidance*

The structure of these group experiences may vary greatly, but the goals are similar. This is evident when attempts to achieve academic goals are considered. Activity groups (EJ 095 856), growth groups (EJ 070 331), reinforcement groups (EJ 058 034), and learning counseling groups (ED 057 414) have all been utilized to help students improve poor academic

skills. The development of positive attitudes toward school has been approached through outdoor camping in groups (EJ 092 451), through growth groups (EJ 070 331), and through learning counseling (ED 057 414). An experience for which Creange (EJ 034 635) assigns the generic term "group counseling" has been successful motivating underachievers. Counseling in groups has been utilized to reduce the fear of tests for high school students (ED 057 414). A group guidance program has been designed to help junior college students achieve improved study habits (ED 016 487). Counselors have also applied group counseling to the remediation of reading problems (EJ 097 621).

The primary intrapersonal goal of group guidance has been to enhance self-esteem and improve self-concept of clients. A report from the Zion Conference on elementary school guidance in Illinois concluded that all group activities in school have the potential to be used for developing a positive self-concept in students (ED 010 891). More specifically, counselors have utilized "guidance groups" (EJ 130 309), activity groups (EJ 095 856), outdoor camping groups (EJ 092 451), and structured group experiences (EJ 163 293) to influence student self-concept.

*Improving Client
Self-Esteem*

Other intrapersonal goals of group guidance and the strategies that have been designed to achieve them include: improving classroom behavior through behavioral group counseling (EJ 105 559); learning decision-making skills through educational group games (EJ 095 847); developing an ability to make responsible career choices through group vocational guidance (ED 048 446); and preventing drug and alcohol addiction in individuals

through group therapy, psychodrama, behavior modification in groups, values-oriented groups, confrontation games, fantasy and gestalt techniques (ED 073 395).

Landreth (EJ 099 081) has argued that groups should help members learn to take responsibility for their own behavior. McGhearty and Womble (EJ 029 426) have developed a group method for helping students to "accept responsibility" for their decisions. Personal responsibility is a quality that can be achieved through group experiences and is necessary for the achievement of other intrapersonal goals.

Any situation where small numbers of people are working together to attain similar understanding or change lends itself to the achievement of interpersonal goals. For example: Adlerian group counseling has been utilized to help children achieve "social adjustment" (EJ 158 412); structured group experiences have been utilized to help children become aware of common feelings among peers (EJ 085 757); and a group guidance program has been suggested for helping junior college students improve their attitudes toward others (ED 016 487). Group counseling has also been proposed as an approach to helping delinquent youth develop more socially acceptable attitudes (ED 068 870).

*Enhancing
Interpersonal
Relationships*

The Zion Conference on elementary school guidance in Illinois concluded that group work is an effective way for children to relate to each other (ED 010 891). Spahn (ED 060 487) found that group counseling in the elementary school can help children learn to explain their feelings, attitudes, values, and problems to peers without fear of adult judgment. Each of these interpersonal goals is important to social functioning.

Group guidance can also help people achieve community goals. As social institutions become increasingly heterogeneous and rapid technological change puts increasing stress on our communities, strategies are needed for helping large groups of people live together cooperatively. Group counseling has been used with black and white secondary school students to reduce tensions resulting from desegregation (ED 074 417). The groups were used to promote "openness and understanding" among students from different cultural backgrounds. Meyer (ED 031 725) suggests that group methods can be used to improve residential college communities as well as the total campus environment. By striving for better relationships among staff and students, as well as increasing sensitivity to student needs, student personnel workers can make the campus a better place to live. When a specific problem comes to a counselor's attention, it is sometimes effective to treat not only the individual involved but his/her family as well, as suggested by Fauber (EJ 031 822) in his description of multiple group counseling.

*Meeting
Community Goals*

Issues and Trends

There are four significant trends in the application of group guidance models. These trends are having an effect on future directions of counseling. One is an emphasis on a developmental approach to group guidance goals, which assumes that most intrapersonal problems occur because of failure of the individual to satisfactorily complete critical life tasks that present themselves as the person grows and changes. Developmental group counseling helps people identify and develop the skills that are needed to complete these

*Developmental
Approach*

life tasks. Dinkmeyer (ED 018 820) has proposed that developmental group counseling become a part of the educational process for all children. The approach has been successful in improving the classroom behavior of elementary students (ED 143 968, ED 060 487) and it has been proposed as a way to improve life in college residence halls (ED 031 725). The increased emphasis on developmental processes from elementary school to college encourages formulation of programs which are designed to provide group guidance to all students, not just those in need of remedial help.

In conjunction with the developmental approach is the trend toward increased numbers of group guidance programs for elementary school students. Dinkmeyer (ED 018 820) argues for this in his proposal for the implementation of developmental counseling groups in elementary schools. In addition to developmental groups, other group approaches have been utilized in elementary school counseling (EJ 151 092, EJ 112 244, EJ 097 621, EJ 105 559, EJ 097 581, EJ 043 743, ED 025 796, ED 010 891, ED 060 487, ED 049 483). Counselors are already aware of those group characteristics most effective with this age group, such as high structure, time limitations, small numbers of participants, and use of role-playing and play materials (ED 010 890).

*Elementary
Guidance
Programs*

Another major trend in group guidance is the application of social reinforcement techniques to group counseling. Social reinforcement in groups has been utilized to help nonverbalizing children (EJ 024 007), to increase adaptive behavior in children (EJ 018 363), to decrease disruptive behavior in children (EJ 105 559), and to help children "set realistic

*Social
Reinforcement
Techniques*

goals" (EJ 036 815). Although several research studies have failed to demonstrate that social reinforcement groups are more effective than other procedures for achieving certain goals (ED 110 857, ED 090 471), more research should be undertaken before the full efficacy of this approach can be determined.

A fourth significant trend in group guidance is the use of group methods to provide consultation services. There is a recognition among some counselors that direct service to clients is not always the most efficient or effective way to help clients. An alternative is consultation, that is, helping intermediate groups of people (such as parents or teachers) to help the clients solve a particular problem. This provides an alternative model to direct, remedial counseling. The notion of consultation has been accepted for a long time, but the application to group guidance is part of a new trend to make consultation a basic role of the counselor. Shaw (ED 012 076) has proposed a comprehensive consultation model with counselor involvement in the total learning environment of a school. Basic to this model are counselor-led group sessions with parents and teachers, a group consultation approach which has been found to be more effective than direct remedial help (EJ 169 305, EJ 097 581) in changing some students' behavior. For example, group consultation has been reported to be effective in helping parents cope with the problems of having a child with learning disorders (ED 019 130). In addition, several group consultation procedures have been proposed to help teachers solve classroom problems (EJ 125 626, ED 114 376). Varenhorst (EJ 108 860) has described how group consultation can be used to help secondary school students act as counselors to their peers.

*Group
Consultation
Services*

Implications for Counselors

There are certain questions with regard to the application of group procedures that will need to be answered in the future. Whether or not group counseling is more effective than other counseling methods has not been resolved. It has been reported that "class-room behavior management" is more effective than "client-centered group counseling" in helping potential school dropouts (EJ 075 521), and that "play media counseling" has been found to be more effective than "verbal group counseling" in helping to change the social position of children (EJ 074 180). Several studies have attempted to compare group counseling to individual counseling (EJ 167 371, EJ 152 915). However, until investigators become more rigorous with regard to defining the variables in their studies, no conclusions can be drawn. Maloney (ED 060 475) concluded from his review of research on group counseling in higher education between 1955 and 1967 that the findings were inconclusive due to experimental procedures. This situation has not changed for group guidance during the ten years since his review. Until the group procedure being evaluated is clearly described and the desired outcomes put in measurable terms, counselors will not be able to use group counseling research data with confidence.

*Need for Rigor
in Research*

Another critical question raises the issue of which characteristics of counseling groups will produce the most effective design. One characteristic that has been examined is the amount of structure that is needed in groups (EJ 089 246, EJ 080 791, EJ 043 758). Another characteristic with which counselors have been dealing is the degree of group

openness to new clients coming into an ongoing group (ED 033 392). Further research is needed to establish the effect of any specific characteristics on counseling groups.

There are numerous possibilities for the utilization of group methods. Design and application depends on the goal of counseling, the population to be served, and appropriate techniques. Success in group counseling is related to the counselor's ability to set realistic goals for a specific population and skill in the use of various techniques to facilitate goal attainment. This requires a variety of group experiences on the part of the counselor and a counselor training program that exposes them to the necessary skills.

*Choosing Goals
and Techniques*

As the developmental approach to group counseling continues to emphasize group guidance for all students, and the need for group counseling becomes more apparent at the elementary school level, counselors and counselor education will need to adapt to the new demands. Counselors need to understand principles of human development and related life tasks. They need to learn how to teach life skills to others. This ability will be enhanced by taking advantage of group processes to facilitate intrapersonal and interpersonal development. Groups will become the most viable approach to developmental counseling if counselors continue to expand their responsibilities to all students.

In recent years, most counseling services in school systems have been cut back. But the trend toward group counseling programs for elementary school students shows that, at least on one level, the potential of group methods is being recognized. If this trend continues, there will be a demand for counselors who can use group activities to help

young children. This will involve counselors in the child's life at a time critical to the learning of intrapersonal and interpersonal behaviors.

The success of social reinforcement group procedures for some problems points to social learning principles as an essential part of a counselor's knowledge base. Group counselors will be called on to help groups of people modify their behavior in some way. Regardless of theoretical orientation, counselors will need to be able to apply reinforcement strategies within group situations.

*New Demands on
Counselors*

Direct, remedial help is not always the most effective, and rarely the most efficient, way to serve large numbers of people. Group consultation offers counselors an alternative. Counselors need to learn how to help parents and teachers respond effectively to the problems of students. This requires the development of consultation skills and an ability to bring members of a community together to work on common goals. Most counselor education programs will have to restructure their programs so that traditional models of helping will be learned along with group counseling and consultation methods.

Summary

There is great diversity among the various models of group counseling. Counselors have used different group methods to help students, from elementary school to college, solve academic, intrapersonal, interpersonal, and community problems. Developmental group counseling has become a viable way of facilitating learning and change in elementary school students, as well as students at the secondary and college levels. Because early development

is so important, the emphasis may be on elementary school children. Social reinforcement group counseling is becoming widespread in its application, and will become part of the group counselor's repertoire of skills. Group consultation procedures have been implemented with good success and are a needed alternative to direct, remedial counseling. However, in order to understand and evaluate these methods, experimental research which has clearly stated hypotheses and clearly defined variables must be applied to group counseling situations. The implication of these trends for the counselor's role and counselor education programs is a new emphasis on the learning of group counseling skills for individual, group, and community change.

The Use of Creative Drama with Acting-Out Sixth and Seventh Grade Boys and Girls

Allan, John B.

Canadian Counselor, 11, 3, 135-42 Apr 77

Describes development and use of creative drama with 30 children over a six month period. Over time, the dramas evolved through four stages: chaos, control and chaos; control; and flexibility. Certain developmental and psychological themes also emerged: narcissism, exhibitionism, activity, orality, dominance, morality, social themes, comedy and rhythm. (Author)

The Differential Long-Term Effects of Client-Centered, Developmental Counselling with Individuals and Group

Wearne, T. D.; Powell, J. C.

Canadian Counselor, 11, 2, 83-92 Jan 77

A study involving 541 female students, in four grade levels in an urban commercial secondary school is reported. It was concluded that individual and group counselling have distinctively different effects, and that these effects tend to last for extended periods (at least one year) without reinforcement. Self-Esteem: The Alternative to Genetic Inferiority

Bewley, Ken

Negro Educational Review, 28, 2, 95-9 Apr 77

51 second and third graders participated in a study to determine the extent to which structured group counseling with elementary school students can affect the child's self-esteem. Secondary purposes were to determine the effects on self-esteem of working with significant adults, namely parents and teachers, in the child's life. (Author/JM)

Effects Of Principal Actor Time Structuring On Goal Attainment In Group Counseling

Jessell, John C.; Bush, John F.

Counselor Education and Supervision, 13, 2, 105-110 Dec 73

Subjects were 84 university and high school students. Data was obtained from responses to a behavioral goal questionnaire and the Truax Relationship Inventory. Structuring of group counseling through the use of principal actor time did not result in differential goal attainment between clients of structured or unstructured groups. Neither was any significant difference noted in the measured therapeutic relationship achieved between counselors and clients of the respective groups. (Author)

Structured Group Experiences
Bender, Robert C.
Elementary School Guidance and Counseling, 8, 1, 71-73
Oct 73

Two activities designed for use in elementary school group work are described. In Activity I, "Pass It On," a succession of children repeat a story showing how communication can be distorted when people don't listen. Activity II is designed to demonstrate the similarity of feelings among peers: children complete short stories begun by the leader and supply adjectives to describe them. (EK)

A Developmental Group Counseling Program for Elementary Schools.

Malcolmson, Ingeborg; Skubinna, Kaye

73 14p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage.

The Del Mar Union School District in southern California began a developmental program for inarticulate, shy, poorly-peer-oriented students. A group program appeared to be the best way to give this type of child a place to make himself heard, to supply ego-supporting activities, to foster broader peer interaction and the development of relationships among group members, and to help the child develop a greater sense of self. The school district, parent involvement, group activities, and initiation of the program are described. Results of the program are: (1) the observable behavior of many of the participating children has changed, (2) teachers felt that a direct effort was being made to enhance the emotional growth of pupils in ways they, in the classroom, could not supply. (SPT)

Our Teachers are Crying: A Positive Approach to Solving Classroom Problems.

Ruben, Ann G.

Sep 75 122p.

Available from: MSS Information Corporation, 855 Madison Avenue, New York, New York 10021 (\$3.75)

Document Not Available from EDRS

This book presents a positive approach to solving classroom problems. It contains eight chapters, the first of which describes some of the problems faced by teachers and offers a solution in the form of group consultation--a situation in which teachers can share their problems. Chapter 2 discusses the consultation group method. It describes the role of the leader, presents exercises to facilitate behavior change, and contains a plan and guidelines for consultation group sessions. There is also a discussion of the similarities and differences between consultation groups and therapy groups. The subject of chapter 3 is the group leader. This chapter describes the leader's functions and role. Chapter 4 discusses prevalent problems which confront the group leader and offers suggestions on how to handle them. Chapter 5 contains sample dialogues of group sessions and a discussion of the phases the group goes through. In chapter 6, the reader is shown how the group sessions can be used to solve classroom problems. Chapter 7 contains a questionnaire and sample responses that evaluate the consultation group experience. The final chapter tells what is needed to improve the teacher training

curriculum in teacher education institutions, and what the public school systems must do to meet the teacher's needs. It also describes what some universities and public school systems are currently doing to meet these needs. (RC)

The Effects of a Reinforcement-Counseling Procedure on the Social Behavior and Sociometric Status of Elementary Students. Huddleston, Richard J.

73 13p.; Best copy available, some pages may reproduce poorly; Paper presented at the Annual Meeting of the Canadian Guidance and Counseling Association, 1973

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Previous research has shown that certain counseling methods, unlike behavioral counseling procedures, have been unsuccessful in improving the sociometric status of unpopular and uncooperative elementary students. This study attempted to assess the effectiveness of behavioral counseling. Forty elementary students were identified as unpopular and uncooperative. Twenty of them were assigned to a control group while 20 others were assigned to four groups of reinforcement counseling. The latter groups met twice a week for five weeks, and the students were assisted to increase the frequency of their rewarding and cooperative behavior while in the presence of their peers. Following treatment, the sociometric instrument was readministered to all students who were randomly assigned to four groups of 10 5s each. Each group participated in a series of work tasks, and observations were made of the counseled and control students' rewarding and cooperative behavior. Analysis of the results revealed no significant differences between the control and counseled groups on gain in sociometric choices or in their behavior while participating in the series of work tasks. Reasons for the failure of the behavioral procedure were attributed to problems in reinforcing students who would not behave in rewarding or cooperative ways toward their peers. (Author/SE)

Our CARE Package of Developmental Guidance for the Elementary School.

Pinellas County District School Board, Clearwater, Fla.

73 118p.

Sponsoring Agency: Bureau of Elementary and Secondary Education (DHEW/OE), Washington, D.C.

EDRS Price MF-\$0.76 HC-\$5.70 PLUS POSTAGE

This book represents a sharing on the part of several counselors working in elementary schools in Pinellas County, Florida. It describes some of the favorite group activities as selected by counselors. Most of the activities can be used with class-size groups; several are designed for smaller groups of children. These suggestions, however, are in no way meant to be a "package" to be used as a unit. They are, instead, intended only as samples of procedures and techniques that have worked for some counselors. Some topics covered through the activities are interpersonal relationships, feelings, values, decision making, career choice, and personal growth and development. All activities are clearly described and divided into age ranges for which they are appropriate. (Author/HMV)

Promoting Adolescent Decision Making Skills With Group Social Models and Structured Group Interaction.

Bergland, Bruce; Quatrano, Louis

74 33p.; Presented at the American Educational Research Association Annual Meeting (Chicago, Illinois, April, 1974)

EDRS Price MF-\$0.76 HC-\$1.95 PLUS POSTAGE

The objectives for this study were to: (1) explore competing treatments for assisting students to identify plans, gather relevant and reliable information, and consider tentative choices which will enable them to make use of these decision-making skills outside the counseling treatment setting; (2) develop and assess the relative efficacy of a structured group interaction technique, a video-presented social modeling procedure and structured interaction; and (3) generate a body of data which will permit the stating and testing of subsequent research hypotheses thus contributing to the development of counseling theory. Eleventh grade males (80) were assigned to an experimental or a control group. The treatments were: (1) structured group interaction; (2) group social modeling; and (3) group social modeling plus structured interaction. Treatment outcomes were measured by administering to each student an attitude questionnaire, career planning inventory, vocational information survey, and a vocational planning questionnaire. Analysis of results show no significant differences among groups on any of the test scores. The author concludes that since no clear evidence of uniform positive treatment effects have been demonstrated, new treatment procedures must be developed which will have the necessary power to effect positive change. The Youth Guidance Systems' (YGS) major goal is the encouragement and facilitation of considered decision making by every student. YGS seeks to establish goals, programs, and evaluation procedures which ensure continued change and relevance. Four goals have been stated for YGS (two student-centered and two staff-centered) to: facilitate decision making; provide personal problem counseling; use school, home, and community resources; and maintain continuous evaluation. Strategies identified to realize these objectives fall in these categories: (1) planning, including administrative and policy level planning, curricular and operational level planning, and articulation level planning; (2) differential staffing, including the staff role of the teacher, the administrator, the guidance coordinator, the counselor, the counselor assistant, the support staff, and volunteer aides; (3) guidance services, consisting of the guidance curriculum (group guidance), group counseling, individual counseling, and home-school-community interaction; and (4) evaluation. Basic changes involved in adopting the YGS model to the school are identified. (SC)

Broadening the Scope of Elementary School Counseling: Some Adlerian Strategies.

Piercy, Fred P.

72 12p.

EDRS Price MF-\$0.76 HC-\$1.58 PLUS POSTAGE

The elementary school counselor appears unable to provide adequate services for all children simply through individual and small group counseling. However, the educational, counseling, and consultative aspects of the Adlerian counseling model offer unlimited possibilities for expanding developmental guidance throughout each child's school and home environment. Since the child functions within a social environment, the Adlerian counselor emphasizes working with those with whom the child has direct contact. Several potentially far-reaching Adlerian strategies are presented which the elementary school counselor, whatever his psychological orientation, may find helpful in broadening the impact of developmental guidance. Cross-Cultural Counseling: Bridge Between Desegregation and Integration. A Study Relative to Group Counseling and its Impact on Students and Faculty.

Brown, Leander A.; And Others
University of Northern Iowa, Cedar Falls. Malcolm Price Lab. School.

Feb 73 35p.: Paper presented at the American Personnel and Guidance Association Convention (San Diego, California, February 9-12, 1973)

EDRS Price MF-\$0.76 HC-\$1.95 PLUS POSTAGE

For the past several years, much emphasis has been placed on open enrollment plans involving bussing that enable black and white students to attend schools together. The Laboratory School of the University of Northern Iowa in Cedar Falls has been involved in such a program since 1968. As the project developed, the potential for very serious problems relating to racial tension and student frustration became evident. To approach these problems and to promote more openness and understanding between students from different communities and

differing cultural backgrounds, cross-cultural group counseling sessions were developed. The groups during the past two years have consisted of combined 7th and 8th graders and combined 9th through 12th graders. Due to administrative support, student requests, and observed behavior change, a similar grouping of students will be employed during the 1972-73 academic year. Counselor observations of the program are examined, and student and faculty questionnaires and analyses of them are also included in this paper. (Author)

This publication examines various aspects of the problem of potential school dropouts and techniques for teaching early career development. Its three sections are concerned with (1) identification and exploration of factors related to potential dropouts; (2) a comparison of the efficacy of treatment of classroom behavior management and group counseling for use with potential dropouts; and (3) differential effects of classroom behavior management and traditional teaching techniques on vocational knowledge and attitudes at fifth and sixth grade levels. For each of these studies introductory material, study methodology and design, a discussion findings and conclusions, and recommendations are included. In addition, extensive tables give statistical information and detailed bibliographies are provided for each study separately. (SES)

The Use of Cases in the Evaluation of Three Counseling Approaches with Elementary School Children.

Palmo, A. J.

May 72 12p.

EDRS Price MF-\$0.76 HC-\$1.58 PLUS POSTAGE

The purpose of the study was to explore the effect of parent and teacher consultation used in conjunction with group counseling on the classroom behavior of first, second, third, and fourth grade children. The instruments selected were in conjunction with the primary purpose of the study; the effect of various counseling approaches on children's classroom behavior. Thus, two instruments were chosen; one the teachers would use to evaluate the children's changes in behavior (Walker, 1968-Walker Problem Behavior Identification Checklist) and a second an objective classroom observer would use to rate children's behavior (Spaulding, 1968-Coping Analysis Schedule for Educational Settings (CASES)). The hypothesis that there would be no significant differences among Group Counseling/Parent-Teacher Consultation, Group Counseling, Parent-Teacher Consultation, and Control Group Procedures was not accepted. Results suggest that Parent-Teacher Consultation was the most effective strategy used in the modification of classroom behavior and that CASES was the most valid and accurate measure of behavior change. EDRS Price MF-\$0.76 HC-\$6.97 PLUS POSTAGE

The theme of the fifth annual Symposium on Group Procedures was "The Use of Group Procedures in the Prevention and Treatment of Drug and Alcohol Addiction." Symposium participants included professionals in counseling; clinical, school, and educational psychology, psychiatry, and social work. In addition, invitations were sent to members of government, law enforcement, and the judiciary. The symposium consisted of the following sessions: a group therapy session; psychodrama intervention with drug addicts; behavior modification with alcoholics; a values-oriented approach to drug abuse prevention education; a game of confrontation with a view to changing the life style of the hard core addict; and

the use of fantasy and gestalt therapy with drug addicts. (WS/Author)

Group Counseling with Delinquent Youth.

Gilman, Merritt; Gorlich, Elizabeth

Rehabilitation Services Administration (DHEW), Washington, D.C.

68 45p.

EDRS Price MF-\$0.76 HC-\$1.95 PLUS POSTAGE

This publication deals with group counseling as a technique for dealing with delinquent youth. In a counseling session, youngsters discuss their experiences, feelings, and ideas under the guidance of a leader. Group counseling is recognized as an effective means of reaching hard-to-reach youth. It is hoped that through sharing, former attitudes may be altered or replaced by ones that are more acceptable to society. The publication stresses careful planning prior to the incorporation of group counseling. The booklet contains discussions of various aspects of the leader's role including: What does the leader represent to the group? What are his responsibilities to the members? What are the leader's goals for the group? How does he steer the members toward these goals? Group Counseling calls for an investment and dedication in time and effort on the parts of those involved. (WS/Author)

Developmental Group Counseling in the Elementary School.
Spahn, Lee P.

May 71 32p.; Research paper submitted in partial fulfillment of the requirements of the degree of Specialist of Education, Barry College, Miami, Fla.

EDRS Price MF-\$0.76 HC-\$1.95 PLUS POSTAGE

This study is concerned with whether developmental group counseling will improve peer relations in the elementary school classroom. It was hypothesized that developmental group counseling would improve peer relations. Group counseling in the schools seems particularly appropriate because of the nature of both the setting and the students. The elementary school student is at a stage in his life in which it is inevitable that he will decrease his total dependence on adult models and seek identification with his peers. Group counseling can provide opportunities for peer interaction in the presence of an understanding adult and without being dependent upon powers of censure and approval. Developmental group counseling provides the opportunity for each child to engage in an interpersonal process, through which he works in the peer group, to explain his feelings, attitudes, values, and problems, with the result that he is better able to deal with developmental tasks. Results showed that third grade boys and girls showed the greatest improvement in sociometric status; and girls at all grade levels profited more than the boys. (Author/TA)

A Summary and Analysis of Group Counseling Research in Higher Education.

Maloney, W. Paul
Fairfield Univ., Conn.
71 19p.

EDRS Price MF-\$0.76 HC-\$1.58 PLUS POSTAGE

The purpose of this study is to summarize and analyze the reported experimental research on group counseling in higher education between 1955 and 1967. The research is summarized and analyzed in terms of the problems, hypotheses, samples, treatments, measurements, analyses, and results. Thirty-one studies are evaluated. The findings suggest that, in general, the research in group counseling is not disciplined, controlled research. The mixed and conflicting results of the research are indicative of the methods and procedures utilized in the studies. The research neither proves nor disproves the usefulness of group counseling in improving academic achievement, changing attitudes, or modifying personality variables. Other problems found relate to: (1) lack of adherence to the experimental design employed; (2) lack of specifically stated hypotheses or the failure to adhere to the hypotheses in the course of the study; (3) failure to

delineate treatments with hypotheses; and (4) failure to use adequate samples and criteria measurements. Recommendations for improvement in future research are also offered. (RK)

The Effects of Two Types of Group Counseling Upon the Academic Achievement and Self-Concept of Mexican-American Pupils in the Elementary School.

Leo, Paul F.

Jan 72 143p.; Doctor's dissertation submitted to University of the Pacific, Stockton, California
Sponsoring Agency: Office of Education (DHEW), Washington, D.C. Cooperative Research Program.

Bureau No.: BR-1-1-039

Contract No.: OEC-9-71-0025(10)

EDRS Price MF-\$0.76 HC-\$6.97 PLUS POSTAGE

A 20-week experimental study investigated effects of 2 group counseling techniques as aids in improvement of academic achievement and self-concept of 144 Mexican American pupils from the 4th, 5th, and 6th grades of 2 elementary schools. Also used in the study were results of a pilot project conducted with Mexican American pupils to compare the Semantic Differential Technique and the Self-Esteem Inventory in measurement of self-concept. Two dependent variables were studied: (1) total academic achievement on the Comprehensive Test of Basic Skills and subtest scores in reading, language, and arithmetic and (2) total self-concept measured by the Semantic Differential Technique and the feelings toward nationality subtest. Independent variables were (1) comparison of the Bicultural Group Counseling Treatment, designed to develop pupil pride in ethnic background, and the Traditional Group Counseling Treatment, which placed emphasis on school adjustment and improvement in academic achievement; (2) treatment effects on the school attended; (3) male and female effects produced by treatments; and (4) comparison of treatment effects on foreign-born and native-born pupils. This latter comparison was possible in only 1 school because of its almost equal proportion of foreign- and native-born students. Pre- and post-test scores were analyzed using analysis of covariance. Findings indicated that none of the variances for the treatments variable proved significant although significant interactions were found in several control variables. The pilot study reported a fairly positive correlation between the Semantic Differential Technique and the Self-Esteem Inventory for measurement of self-concept. (Author/NQ)

EDRS Price MF-\$0.76 HC-\$1.95 PLUS POSTAGE

Learning Counseling, a special, small-group type of academically oriented counseling for underachieving high school students, counseled 819 students in the Pittsburgh Public schools during 1969-1971. Materials to train teachers to become Learning Counselors were developed: a manual, a series of video tapes, several casebooks, and 4 essays explaining the behavioral systems approach on which Learning Counseling is based. Two summer workshops were held to train 40 graduate students and teachers for extending Learning Counseling into higher education and teacher training. The data were subjected to an intensive analysis. The first analysis, concerning the Learning Behavior Inventory demonstrated a consistent agreement between students and teachers as to what overt and covert behaviors were shown by underachieving students. The 2nd analysis demonstrated highly significant changes in an increased students' positive attitude towards education, a reduced fear of tests and evaluation on the Fear Survey Inventory, and an increase in the desirable behaviors shown by good students. In summary, Learning Counseling appears to be a popular counseling program for underachievers that produces documented affective and behavioral change. (Author)

Grant No.: OEG-2-700035(509)

EDRS Price MF-\$0.76 HC-\$1.95 PLUS POSTAGE

The purpose of this study was to compare the relative effectiveness of 4 approaches to drug abuse prevention among secondary school youth. The 4 approaches employed were: (1) a standard unit in health classes dealing with drug abuse; (2) group counseling using relationship techniques in addition to the health unit; (3) group counseling using model

reinforcement techniques and a role model who has not abused drugs in addition to the health unit; and (4) group counseling using model reinforcement techniques and a role model who is a reformed drug abuser in addition to the health unit. Criteria for evaluative purposes included gain in knowledge, changes in attitudes, and reduction in drug abuse rates following the study. This study failed to identify any one approach as being more successful than any other approach with regard to knowledge gained, attitudes changed or the use of drugs. None of the approaches had any impact on the attitudes of the students toward drugs, nor were any of the approaches effective in reducing amount of drug use. Of the counselors, those who did function as reinforcement counselors moved their groups toward healthier attitudes and reduced use of drugs; but these results did not lend themselves to adequate statistical analysis. It is important to note that the involvement of drug experienced models did not show any particular effects. (Author/TA)

Elementary School Group Counseling by Mental Health Consultants.

Cline, Brenda J.; And Others

Bexar County Community Guidance Center, San Antonio, Tex.; Wilford Hall USAF Medical Center, Lackland AFB, Tex.

69 20p.

EDRS Price MF-\$0.76 HC-\$1.58 PLUS POSTAGE

The effectiveness of an elementary school group counseling program that was conducted in the school setting by consultants from a community mental health agency was investigated. Subjects for the experimental group were twelve elementary school students who evidenced significant school-related problems, but seemed to have more potential for learning, either socially or academically than they had exhibited. Three mental health specialists led one and one half-hour meetings, which were held weekly as part of the school curriculum. Academic and attitudinal school grades were used as the criterion for evaluation. An analysis of variance of the grades indicated a significant positive increase at the .05 level in the mean Grade Point Averages of the participating students. (Author)

Computerized Simulated Games: A Socialization Tool for Child Guidance.

Brown, Jeanette A.; MacDougall, Mary Ann
Virginia Univ., Charlottesville.

5 Apr 71 13p.: Paper presented at the American Personnel and Guidance Association Convention, Atlantic City, New Jersey, April 4-8, 1971.

EDRS Price MF-\$0.76 HC-\$1.58 PLUS POSTAGE

This paper describes a computer-controlled simulation game designed to teach social skills to elementary school pupils. The major purposes of this man machine social system are to develop in students the ability to: (1) observe pupil behaviors in group problem-solving situations, (2) identify and analyze the relationship of these behaviors to the success of the group in its problem-solving task, and (3) generalize the implications of these observed behaviors to other settings. The game consists of three stages which correspond to the above objectives and represent an integrated instructional system in which pupils, counselors, and media components interact. In the first stage the pupil views video tapes which present a wide range of pupil behavior types in a group setting. The second stage requires the pupil to analyze his observations by interrogating a computer system. In the final stage students meet with a counselor in a group discussion to evaluate the information they have individually acquired. They examine alternative solutions to the problem and a consensus is achieved through an exchange of various socio-cultural views held by the participants. Implications of such a system for elementary school counseling are discussed. (RSM)

A Job Placement and Group Vocational Guidance Program for Culturally Deprived High School Youth. Phase I, June 28, 1968, through June 30, 1969.

Vocational Guidance Service, Houston, Tex.
29 40p.

Sponsoring Agency: Manpower Administration (DOL), Washington, D.C. Office of Special Manpower Programs.

EDRS Price MF-\$0.76 HC-\$1.95 PLUS POSTAGE

This report on the first year's operation of a program providing group counseling and placement services for disadvantaged youth in Houston, Texas, outlines the development of relationships with schools, business, labor, students, and other agencies. It includes an overview of materials presented to the students and techniques used in the presentation. Despite the success of the first year, the program can be improved by increasing individual counseling

and cutting the 30-week group program to 18 weeks. Suggestions are made in program developmental sequence to help guidance program administrators establish similar programs elsewhere. (BH)

Group Counseling for Urban Schools: A Handbook.
Pennsylvania Advancement School, Philadelphia.

71 82p.

Sponsoring Agency: Office of Education (DHEW), Washington, D.C.

EDRS Price MF-\$0.76 HC-\$4.43 PLUS POSTAGE

Established in September 1967 and funded under ESEA Title I and Title III, the Pennsylvania Advancement School (PAS) is a non-profit corporation under contract to the School District of Philadelphia. Funds from the Education Professions Development Act and from private foundations have been used to support small projects initiated by the school. About 200 underachieving boys, were selected from the fifth, sixth, seventh, and eighth grades of Philadelphia public and parochial schools. During the first two years of PAS, boys remained for a 14-week term; currently the students attend for an entire school year. The PAS program also includes curriculum development, intern training, and staff development activities. During 1970-71, PAS is helping to prepare a core staff group for the opening of a new middle school in September of 1971. In its external staff development program, PAS works closely with groups of teachers and administrators in six Philadelphia public schools, helping each to plan and operate semi-autonomous units called "minischools." PAS conducts an intensive summer program for these groups and several PAS staff members are assigned full-time to help the minischools during the school year. (Author/JM)

Internal reinforcement control is defined as one's belief that his rewards or punishments are contingent upon his own behavior. This study tested two main hypotheses: (1) that inconsistency in the home environment interferes with the development of internal reinforcement control, and (2) that internal reinforcement control can be increased by special teacher efforts in the classroom, and by group discussions or counseling outside the class. A secondary hypothesis was that internal reinforcement control relates positively to school achievement. The hypotheses were tested in four separate studies using subject population samples of elementary school pupils and college freshmen and sophomores. The studies assessed relationships between family environment, intelligence, school achievement and teacher counseling. The findings partly supported the first hypothesis. Internal reinforcement control was related to home environment, with sex differences. For males, a supportive, consistent home related positively to internality. For females, a somewhat rejectant home seemed to force independence and development of internal control. The second hypothesis was supported by the finding that feelings of internal reinforcement control increased in both early graders and college students after special counseling. The secondary hypothesis was supported for early graders, but not for college students. (Author/NH)

The Effect of the Group Leader(s) Race on Group Counseling Undertaken to Improve Intergroup Attitude Among Racially Mixed Fifth and Sixth Grade Children.

Owen, Isaiah
West Virginia Univ., Morgantown.
69 110p.

EDRS Price MF-\$0.76 HC-\$5.70 PLUS POSTAGE

The purpose of this study was: (1) to determine the effect, if any, that the race of the group leader has on the improvement in intergroup attitude of racially mixed elementary school students who participate in group counseling; and (2) to determine whether racially mixed groups of elementary students who participate in group counseling

make more favorable improvement than those who engage in contact activities only. A total of 10 students were taken from the total fifth and sixth grade population who had been tested. These 10 were assigned to each of six groups: (1) one led by a white counselor; (2) one by a black counselor; (3) one by a black and a white counselor; (4) three control groups of the same composition. At the end of eight weeks, these subjects were post-tested on the same instruments as before. Findings include: (1) no differences in the mean gains in intergroup attitudes among the six groups; (2) no differences in gains in attitude between the counseled groups and control groups; (3) no differences in the mean gains in attitudes between any of the three experimental groups. The study produced no significant findings that would show group counseling to be an effective means of alleviating racial attitudes. (Author/KJ)

Dissident Youth's Appeal.

Ohlsen, Merle M.

Indiana State Univ., Terre Haute.

70 18p.

EDRS Price MF-\$0.76 HC-\$1.58 PLUS POSTAGE

This paper is designed to help youth's significant others harness dissident youth's energy into the reins of society's problems. Included is a comparison between healthy rebellion (arising out of love for something) and neurotic rebellion (having no purpose except to fight conformity or the establishment). The author classifies secondary and college students as adolescents who are briefly described and then compared to dissident youths. He notes that few student movements have occurred without faculty participation and enumerates three types of students who join in campus violence: (1) a group largely represented by Students for a Democratic Society; (2) an unorganized group concerned with such issues as the American foreign policy in Vietnam, our defense commitments and justice for the black community; and (3) a large group of college students demanding more liberal curriculum goals and improvement in instruction. Listed are several recommendations to channel the energy of dissident youth: (1) the need for institutional change; (2) increased parental responsibility for their children; and (3) administrators who deal with real issues and genuine student involvement. Techniques used to achieve these goals are identified. (Author/MC)

Group Procedures in Guidance: A Bibliography.

Zimpfer, David G.

Rochester Univ., N.Y.

May 69 124p.

Available from: New York State Personnel and Guidance Association, Room 378, Richardson Hall, 135 Western Avenue, Albany, New York 12203 (No price is quoted)

Document Not Available from EDRS.

This bibliography lists comprehensively the literature and research on group procedures in guidance and counseling in educational settings. Books, dissertations, unpublished documents and journal articles are included. The bibliography is organized into two major sections: a topical listing and an author listing. Specific publications are listed under as many topical headings as seem appropriate. The "general" categories which appear occasionally comprise those listings which span a whole major topical area. Materials produced up to the end of 1968 are represented. (Author/KJ)

Multiple Counseling in Open and Closed Time-Extended Groups. Chambers, W. M. American Personnel and Guidance Association, Washington, D.C.

Mar 69 8p.; Paper presented at the American Personnel and Guidance Association Convention, Las Vegas, Nevada, March 30--April 3, 1969

EDRS Price MF-\$0.76 HC-\$1.58 PLUS POSTAGE

The open time-extended group, run by multiple counselors, adds a facilitating dimension to the counseling function--a dimension that exemplifies the concepts of self-growth and self-actualization by first providing the atmosphere for the client and then by allowing him to progress at his own rate and to a depth which he determines. An open group differs from a closed group in the following ways: (1) no set size, (2) anyone can come, (3) participant behavior determines what is to be focused upon, when it will be focused on and how long the focus will remain there; and (4) time is practically limited to three to four hours, theoretically it should be unlimited. Varying group structure results in changing the dynamics of groups. Destructiveness or the tearing down of defenses without providing for new replacement patterns is more likely in open groups. There is also a significant amount of experimentation as well as creativity observed in open groups. Training values include the opportunity to observe co-workers to see how they handle certain situations. In addition, counselors working with open groups are essentially "forced" to develop spontaneity and flexibility in style. (Author/KJ)

A Demonstration Study of Significant Others in Producing Change in Self-Concept and Achievement in Kalamazoo Secondary School Underachievers.

Engle, Kenneth B.; Szyperski, Thomas

Kalamazoo Public Schools, Mich.

30 Jun 65 23p.

Sponsoring Agency: Michigan State Board of Education, Lansing.

EDRS Price MF-\$0.76 HC-\$1.58 PLUS POSTAGE

The hypothesis of this 3-year study was that contact with supportive influences (peer leaders, personal counseling interviews, group counseling sessions, and warm, sincere, interesting teachers) would improve the academic performance of underachieving secondary school students. The subjects, 440 seventh, ninth, and 10th graders from the Kalamazoo (Michigan) Public School system, were divided into four experimental and four control groups. Each experimental group received one form of the supportive treatment. The results of the pre- and post-testing indicated that the overall objectives of improved grades and reduced anxiety were not realized. However, the "peer leader" and the "group counseling" groups showed fewer absences and tardinesses and milder, less frequent disciplinary problems. These inconclusive findings reinforce the hypothesis that the underachieving syndrome is rooted in the home and environment and that it should be attended to in the upper elementary years. Final page of document marginally reproducible. (KG)

Technique and Facilitation of Developmental Groups.

Meyer, Marilyn M.

American Personnel and Guidance Association, Washington, D.C.

31 Mar 69 6p.; Paper was presented at the American Personnel and Guidance Association Convention, Las Vegas, Nevada, March 30--April 3, 1969.

EDRS Price MF-\$0.76 HC-\$1.58 PLUS POSTAGE

Counselors working with developmental groups need: (1) a thorough understanding of their group, (2) great skill, and (3) deep personal involvement. The author suggests specific characteristics for successful developmental groups: (1) the desire of the entire residence hall staff to be involved, (2) a co-ed group limited to eight members, and (3) an evolutionary pattern in the development of the group. Groups can provide: (1) support for resident assistants in becoming more sensitive to themselves and the students, (2) a close

working relationship between resident hall staffs and the counseling center, and (3) a chance for counselors to become sensitive to the needs and problems of the campus and to create a more psychologically healthy climate on the campus. (Author/EK)

Behavioral School Counseling: A Demonstration of the Stanford Career Planning Project.

Thoresen, Carl E.; And Others

American Personnel and Guidance Association, Washington, D.C.

31 Mar 69 28p.; Paper presented at the American Personnel and Guidance Association Convention, Las Vegas, Nevada, March 30--April 3, 1969.

EDRS Price MF-\$0.76 HC-\$1.95 PLUS POSTAGE

The Stanford Career Planning Project designed and tested the effectiveness of three competing experimental treatments for promoting career exploration in adolescents. They were: (1) group structured stimulus materials, (2) group social modeling, and (3) a combination of the two. Planned stimulus materials were prepared and used in four group counseling sessions with eight subjects per counseling group. Four video-presented group social models were developed and used in four sessions paralleling the content of the structured stimulus materials. The sequence as well as content of these first two treatments were followed in the third treatment. A variety of learning activities and suggested counselor comments are included in the report to help achieve the following behavioral objectives: (1) given a small group of between four and eight high school students, it will be possible to identify student verbal responses demonstrating career information-seeking behaviors; (2) given the same type of group, it will be possible to use four types of verbal and nonverbal reinforcers immediately after students' verbal demonstrations of above-indicated behaviors; (3) it will be possible to use at least one method for determining how effective the group counseling program actually was. (Author/CJ)

An Inventory of Reading Attitude. Improving Reading Instruction, Monograph 4.

San Diego County Dept. of Education, Calif.
Nov 61 23p.

EDRS Price MF-\$0.76 HC-\$1.58 PLUS POSTAGE

The San Diego County Inventory of Reading Attitude was developed as part of a reading study project in 1959-60 comparing three approaches to reading instruction. The 114 items on the original instrument were item analyzed, and the 25 most discriminating items are included in the revised form. Data for standardization are presented for 381 primary-grade students and for 376 intermediate-grade students in San Diego, California. Tables report the norms as expressed in stanines. Teacher judgment of reading attitudes of the three students with poorest reading attitudes and the three students with best reading attitudes in each classroom are compared with inventory scores. The difference between the two groups was found to be significant well beyond the 1 percent level of confidence when independent teacher judgment of reading attitude was used as the validity criterion. Uses of the inventory discussed include group counseling, individual counseling, classroom research, inservice education, and parental conferencing. A copy of the inventory and an answer key are included. (CM)

Small Group Counseling: A Potential Means of Confronting Adjustment Problems in the Lower Elementary School.

Yunker, John A.
Chicago Univ., Ill. Dept. of Guidance and Counseling Services.

Oct 68 89p.

EDRS Price MF-\$0.76 HC-\$4.43 PLUS POSTAGE

This paper reviews the literature relating to small group counseling in the lower elementary-school setting, to help children improve human relations and adjust socially. Discussed are: (1) the importance of early childhood education, (2) the role of guidance in early education, (3) the use of groups in elementary school guidance, (4) group counseling and group therapy literature, (5) influences which determine the success of the counseling or therapy group, and (6) outcomes and benefits attained from group counseling and group therapy. The author also proposes a program of group counseling for the early primary grades. A comprehensive bibliography is included. (NS)

Social Development Program. 1967 Report.

Ptaschnik, Jeffrey

Pittsburgh Public Schools, Pa.

67 66p.

Sponsoring Agency: Office of Education (DHEW), Washington, D.C.

EDRS Price MF-\$0.76 HC-\$3.32 PLUS POSTAGE

The Social Development Program was originated under Title I to aid socially maladjusted students, particularly disadvantaged Negro students, to adjust socially and academically. Group dynamics were used to influence the self-concepts of sixth and seventh graders from five participating schools. This report states the formal definition of the program and outlines the objectives, antecedents, and processes. It also presents the results of a seven-month evaluation of the program. The results indicate the program is generally compatible with the total school system. However, more permanent quarters are needed. More financial support would assure continuity of leadership. A redefinition of student selection criteria is recommended, as is the employment of a more fully qualified staff. A more specific program definition of counseling, better utilization of resource materials, and better feedback from group leaders are also recommended. Further evaluation of the program will depend on a more specific formal definition. (NG)

GROUP WORK WITH PARENTS OF CHILDREN WITH LEARNING DISORDERS.
BARMAN, ALICEROSE S.
North Shore Mental Health Association, Winnetka, Ill.
17P.

EDRS PRICE MF-\$0.76 HC-\$1.58 PLUS POSTAGE

SINCE THE PARENTS OF CHILDREN WITH LEARNING DISORDERS FELT ISOLATED FROM THEIR CHILDREN, THE PSYCHIATRIST IN CHARGE OF THE NORTH SHORE MENTAL HEALTH ASSOCIATION DECIDED GROUP WORK WITH THESE PARENTS WAS NEEDED. FROM THE EXPERIENCES OF WORKING WITH SEVERAL SUCH GROUPS IT HAS BEEN DECIDED THAT (1) A GROUP SHOULD BE COMPOSED ONLY OF PARENTS WHOSE CHILDREN HAVE BEEN PROFESSIONALLY DIAGNOSED AS HAVING A PERCEPTUAL PROBLEM, (2) THE GROUP SHOULD MEET EVERY OTHER WEEK FOR 8 SESSIONS FOR A PERIOD OF 1-1/2 HOURS, (3) A FEE OF \$10 SHOULD BE CHARGED, ALTHOUGH NO ONE WOULD BE DENIED ADMISSION BECAUSE OF INABILITY TO PAY, (4) GROUP SIZE SHOULD BE FROM 10 TO 12, (5) THE CHILDREN REPRESENTED SHOULD RANGE NO MORE THAN 4 YEARS IN GRADE LEVEL, AND (6) A GROUP SHOULD BE COMPOSED OF PARENTS AT THE SAME LEVEL OF KNOWLEDGE OR LACK OF IT CONCERNING PERCEPTUAL HANDICAPPING. THE GOALS OF THESE GROUPS HAVE BEEN (1) TO GIVE FACTUAL KNOWLEDGE ABOUT A KIND OF DIFFICULTY WHICH IS LITTLE UNDERSTOOD, (2) TO PROVIDE A PLACE FOR DISCUSSION OF FEELINGS CONCERNING THE CHILD, AND (3) TO PROVIDE A CLEARINGHOUSE WHERE USEFUL TECHNIQUES OF MANAGEMENT CAN BE SHARED. EVALUATIONS MADE BY MOST OF THE MEMBERS OF THE GROUPS HAVE INDICATED THAT THESE GOALS HAVE BEEN MET WITH SOME DEGREE OF SUCCESS IN ALL AREAS. ALSO, IN SPITE OF THE FACT THAT NO PATTERN OF PERCEPTUAL DIFFICULTY IS LIKE THE NEXT, CERTAIN GUIDEPOSTS TO HELP PARENTS HAVE BEEN FORMED BY THESE GROUPS. INCLUDED ALSO ARE QUOTATIONS TAKEN FROM A PARENT'S EVALUATION SHEET TELLING WHY THE GROUP WAS BENEFICIAL. (C0)

DEVELOPMENTAL GROUP COUNSELING.
DINKMEYER, DON
De Paul Univ., Chicago, Ill. School of Education.
9P.

EDRS PRICE MF-\$0.76 HC-\$1.58 PLUS POSTAGE

THE AUTHOR BELIEVES THAT GROUP COUNSELING PROVIDES A UNIQUE METHODOLOGY AND A UNIQUE OPPORTUNITY FOR SOCIAL LEARNING. A GUIDE TO THIS APPROACH IS PRESENTED. DEVELOPMENTAL GROUP COUNSELING IS SEEN AS PART OF THE EDUCATIONAL PROCESS. THIS APPROACH HELPS CHILDREN FACE CHANGES AS THEY OCCUR WITHIN THE CHILD AND THE WORLD. EMPHASIS IS PLACED UPON HELPING THE CHILD ARRIVE AT SOME NEW METHODS OF PROBLEM-SOLVING IN THE PERSONAL-SOCIAL AREA. THIS INVOLVES THE EXAMINATION, EXPLORATION, AND IDENTIFICATION OF THE CHILD'S APPROACH TO LIFE TASKS. THE FOCUS IS ON ISSUES AND CONCERNS IMPORTANT TO

THE COUNSELEE. DEVELOPMENTAL TASKS WOULD PROVIDE BOTH LONG AND SHORT RANGE GOALS FOR THE COUNSELING PROCESS. THE OBJECTIVES OF GROUP COUNSELING ARE SPELLED OUT. THE RATIONALE FOR THE GROUP PROCESS STEMS FROM A RECOGNITION THAT MOST PROBLEMS ARE PRIMARILY SOCIAL OR INTERPERSONAL. SOME OF THE MECHANISMS WHICH CAN BRING ABOUT EMOTIONAL PERSONAL-SOCIAL GROWTH ARE DESCRIBED. THE ORGANIZATION OF DEVELOPMENTAL GROUPS IS DISCUSSED. THE AUTHOR HOPES THAT THIS PAPER WILL ENCOURAGE ELEMENTARY COUNSELORS TO CONSIDER A PROCEDURE WHICH MAY HELP THEM REACH GREATER NUMBERS OF CHILDREN MORE EFFECTIVELY. (IM)

GROUP GUIDANCE IN JUNIOR COLLEGE--A FRAME OF REFERENCE.

WITHERSPOON, FREDDA D.

Saint Louis Junior Coll. District, Forest Park Community Coll., Mo.

67 119P.

EDRS PRICE MF-\$0.76 HC-\$5.70 PLUS POSTAGE

THIS GROUP GUIDANCE PROGRAM IS DESIGNED TO PROVIDE (1) A CHANCE FOR SELF-ASSESSMENT OF PERSONAL STRENGTHS AND WEAKNESSES, (2) IMPROVEMENT OF ATTITUDES IN HUMAN RELATIONS, (3) IMPROVEMENT OF STUDY HABITS AND TECHNIQUES, AND (4) REALISTIC ASSESSMENT OF VOCATIONAL ABILITIES. GROUP GUIDANCE IS INTENDED TO SUPPLEMENT, NOT SUPPLANT, INDIVIDUAL COUNSELING. THIS MONOGRAPH SUGGESTS CERTAIN ORGANIZED GROUP EXPERIENCES, PARTICULARLY FOR USE WITH UNDER-OR NONACHIEVERS, WHENEVER ENOUGH STUDENTS HAVE A COMMON PROBLEM TO BE SOLVED. THE COUNSELOR MUST UNDERSTAND THE DYNAMICS OF GROUP BEHAVIOR, MUST BE A SKILLFUL DISCUSSION LEADER, MUST BE ALERT TO BOTH THE INDIVIDUAL'S AND THE GROUP'S REACTIONS, AND MAY CHOOSE TO BE DIRECTIVE OR NON-DIRECTIVE. SOME TECHNIQUES FOR CONDUCTING THE SESSIONS ARE (1) DISCUSSION, (2) SOCIOMETRIC (ROLE-PLAYING), (3) CASE CONFERENCE, AND (4) SELF-APPRAISAL. EACH TECHNIQUE IS EXPLAINED, WITH EXAMPLES OF ITS USE. WAYS OF EVALUATING THE SUCCESS OF THE GUIDANCE SESSIONS ARE (1) CONTINUOUS APPRAISAL (IN BOTH GROUP AND INDIVIDUAL SITUATIONS), (2) TERMINAL REVIEW (AT THE END OF A SEMESTER OR YEAR), AND (3) A CONTROLLED STUDY (OF THOSE WITH AND WITHOUT GROUP GUIDANCE OR UNDER VARIOUS PROCEDURES). ALL METHODS OF EVALUATION MAKE USE OF A SIMPLE QUESTIONNAIRE TO ANALYZE THE REACTIONS OF THE GROUP MEMBERS TO THE VARIOUS ACTIVITIES. (IM)

A PROPOSED MODEL AND RESEARCH DESIGN FOR PUPIL PERSONNEL SERVICES IN THE PUBLIC SCHOOLS, MONOGRAPH 1.

SHAW, MERVILLE C. ; TUEL, JOHN K.

Chico State Coll., Calif.

JUL65 112P.

EDRS PRICE MF-\$0.76 HC-\$5.70 PLUS POSTAGE

THE NEED TO DEFINE THE ROLE OF THE GUIDANCE SERVICES IS THE BASIS FOR THE 3-YEAR STUDY. THE MAJOR HYPOTHESIS IS THAT GUIDANCE SPECIALISTS CAN ENHANCE LEARNING MORE EFFECTIVELY THROUGH INTERVENTION IN THE LEARNING ENVIRONMENT OF CHILDREN THAN THROUGH DIRECT REMEDIAL APPROACHES TO CHILDREN THEMSELVES. THE MODEL USES AN APPROACH TO GUIDANCE ACTIVITIES INVOLVING AN EMPHASIS ON PROVIDING SERVICES PRIMARILY TO TEACHERS AND PARENTS. THE BASIC RESEARCH ASPECT WILL INVOLVE THE COLLECTION OF COMPREHENSIVE DATA ON THE SCHOOL ENVIRONMENT FROM A WIDE SAMPLE OF THE NATIONAL SCHOOL POPULATION. THE ACTION RESEARCH WILL INVOLVE THE OPERATION OF DEMONSTRATION CENTERS IN PUBLIC SCHOOLS AT EACH LEVEL. ONLY 21 SELECTED SCHOOLS WILL BE INVOLVED SO THAT IMPLEMENTATION OF THE OVERALL CONCEPTUAL MODEL WILL BE EXECUTED AS FULLY AS POSSIBLE UNDER LOCAL CIRCUMSTANCES. SELECTED GUIDANCE SPECIALISTS SERVING THESE SCHOOLS WILL BE GIVEN INTENSIVE TRAINING AT SUMMER WORKSHOPS HELD AT THE UNIVERSITY OF CALIFORNIA, LOS ANGELES. BEGINNING IN 1964 THEY WILL DEVOTE ABOUT 4 HOURS A WEEK TO CONDUCTING GROUP SESSIONS WITH PARENTS. THE NEXT YEAR, GROUP WORK WITH TEACHERS WILL BE ADDED. ASSESSMENTS OF A WIDE SPECTRUM OF VARIABLES WILL BE CONDUCTED AS SPECIFIED POINTS THROUGHOUT THE STUDY. (AO)

GROUP GUIDANCE IN THE ELEMENTARY SCHOOL.

SCHMIDT, WESLEY I.

Illinois State Office of the Superintendent of Public Instruction, Springfield.

66 18P.

EDRS PRICE MF-\$0.76 HC-\$1.58 PLUS POSTAGE

GROUP WORK IN THE ELEMENTARY SCHOOL IS AN EFFECTIVE METHOD FOR DEALING WITH THE INSTRUCTIONAL ASPECTS OF GUIDANCE AND OF ASSISTING CHILDREN WHO SHOW A DEFEATING SELF-CONCEPT OR AN INABILITY TO RELATE TO OTHERS. GROUP WORK IS AN EFFICIENT WAY OF DEALING WITH GROWING NUMBERS OF MALADJUSTED CHILDREN IN SCHOOLS. THE FORCE OF THE PSYCHOLOGICAL GROUP IS POWERFUL AT THE ELEMENTARY LEVEL. GROUP FAILURE IS CAUSED BY IGNORANCE OF THE DYNAMICS OF HUMAN INTERACTION. SUCH DYNAMICS ARE DESCRIBED. AS ARE THE ELEMENTS OF A SUCCESSFUL GROUP. GROUP WORK CAN FURTHER THE STUDENT'S KNOWLEDGE OF THE SELF-CONCEPT, THE WORLD OF WORK AND EDUCATION, AND THE RELATIONSHIP BETWEEN SELF AND WORLD. THESE OBJECTIVES ARE ACHIEVED AT THE INSTRUCTIONAL LEVEL THROUGH SUCH ACTIVITIES AS WRITING AND TELLING STORIES, AND MAKING BIOGRAPHICAL STUDIES. GROUP GUIDANCE EMPHASIZES THE NEEDS OF STUDENTS AND ADJUSTMENT TO THE SCHOOL SETTING THROUGH GET-ACQUAINTED METHODS, LEADERSHIP DEVELOPMENT, AND ROLE-PLAYING. SMALL GROUP COUNSELING DEALS MORE WITH PROBLEMS OF ATTITUDES TOWARD SELF AND SELF DEFINITION. THE INSTRUCTIONAL PROGRAM AND GROUP GUIDANCE PROVIDE DEVELOPMENTAL ACTIVITIES FOR ALL STUDENTS AND ALSO SERVE TO TEACH STUDENTS ABOUT THE RANGE OF GUIDANCE SERVICES AVAILABLE. ALL GROUP ACTIVITIES HAVE GUIDANCE POTENTIAL. THE GROUP IS A MAJOR DETERMINANT OF SCHOOL ADJUSTMENT. THIS IS ONE OF THE REPORTS FROM THE ZION CONFERENCE AND THE ELEMENTARY SCHOOL DEMONSTRATION CENTERS INCLUDED IN "ELEMENTARY SCHOOL GUIDANCE IN ILLINOIS." (PS)

COUNSELING CHILDREN IN GROUPS.

OHLSEN, MERLE M.

Illinois State Office of the Superintendent of Public Instruction, Springfield.

66 15p.

EDRS PRICE MF-\$0.76 HC-\$1.50 PLUS POSTAGE

COUNSELING IS AN ACCEPTING, TRUSTING RELATIONSHIP DEALING WITH NORMAL CHILDREN AND EMPHASIZING THE COUNSELOR'S SPECIAL ABILITY TO LISTEN, EMPATHIZE, AND UNDERSTAND. THE SETTING OF GROUP COUNSELING PROVIDES EXCELLENT CONDITIONS FOR LEARNING. EFFECTIVE GROUP COUNSELING INVOLVES TREATMENT BY THE GROUP AS WELL AS INDIVIDUAL TREATMENT WITHIN THE GROUP. COUNSELORS MUST BE AWARE OF HOW GROUP MEMBERS' COMMENTS AND ACTIONS INFLUENCE OTHER MEMBERS. THE SELECTION OF YOUNGSTERS FOR GROUP COUNSELING SHOULD BE BASED UPON THE TYPE OF PROBLEM (STUDENTS WITH SIMILAR PROBLEMS SHOULD NOT BE PLACED IN THE SAME GROUP), READINESS FOR COUNSELING, THE CHILD'S IMPACT ON OTHER GROUP MEMBERS, AND HIS PARENTS' SUPPORT. GROUP COUNSELING METHODS MUST BE MODIFIED FOR USE WITH ELEMENTARY SCHOOL CHILDREN (FOURTH, FIFTH, AND SIXTH GRADERS). SUCH GROUPS REQUIRE MORE STRUCTURE AND SHOULD BE MORE LIMITED IN TIME AND NUMBER OF PARTICIPANTS. THE COUNSELOR PLAYS A MORE ACTIVE ROLE, AND SUPPORT AND ASSISTANCE FROM TEACHERS AND PARENTS IS NEEDED OUTSIDE THE GROUP. ROLE-PLAYING IS AN EFFECTIVE METHOD FOR THIS AGE LEVEL. AS VERBALIZATION IS DIFFICULT FOR PRIMARY SCHOOL-AGE CHILDREN, MORE PLAY MATERIAL IS NECESSARY. TEACHERS MAY USE GROUP TECHNIQUES TO MOTIVATE LEARNING AND TO PROVIDE INDIVIDUALS WITH AN OPPORTUNITY TO RELIEVE A SPECIAL PROBLEM THROUGH ROLE-PLAYING. THIS IS ONE OF THE REPORTS FROM THE ZION CONFERENCE AND THE ELEMENTARY SCHOOL DEMONSTRATION CENTERS INCLUDED IN "ELEMENTARY SCHOOL GUIDANCE IN ILLINOIS." (PS)
